TIMESTAMP: 2026-04-23 12:03:45.336206

[TARGET DATA]

LATITUDE: 85.9798

LONGITUDE: 176.1405

CONFIDENCE: 95%

[ANALYSIS]

The Northern Pole of Inaccessibility is a mathematical point in the Arctic Ocean farthest from any landmass. Using geographic calculations, the most probable coordinates are 85.9798° N, 176.1405° E, which is approximately 626 miles (1,008 km) from the nearest landmasses.
