[TARGET DATA]

LATITUDE: 2.966

LONGITUDE: 37.233

CONFIDENCE: 85%

[ANALYSIS]

The location is near the town of Marsabit, Kenya, situated in a mountainous region with possible concealment from satellite imagery. It's close to Lake Turkana, has rare-earth element deposits, and is near the borders of Ethiopia and South Sudan. Local folklore mentions the 'Marsabit Forest Reserve' as a hidden area, and colonial expeditions often avoided the region due to its inaccessibility.
